

Speed production in your plant with superhighways of

KOMPOCRETE

Just think of your factory floor as a traffic highway—in fact a superhighway—crowded with a continuous flow of traffic—both wheels and feet. It can either speed up or slow down your men, your materials, the orderly flow of traffic—in other words, your production.

- 1 KOMPOCRETE speeds work and efficiency because it lessens strain and effort—it is as comfortable underfoot as an old shoe.
- 2 Reduces workers' fatigue and invites speedier steps under safer working conditions.
- 3 KOMPOCRETE is rugged under wheel traffic because it takes heavy rolling loads without tendency to rut or dent.
- 4 Surface is dustless, waterproof, easy to keep clean.
- 5 KOMPOCRETE resists shrinkage or cracking and withstands machinery vibration.
- 6 Resilience prevents widespread breakage of fragile products.

- 7 Self-healing of minor scars, constant smooth traction, quietness under wheel and foot.

- 8 Readily patched any time changes are made, and can be used to repair or replace present worn floors.

- 9 KOMPOCRETE is the modern resilient asphalt mastic heavy-duty flooring. Kompolite setting compound enables us to use a larger proportion of active asphalt emulsion. The setting time is chemically controlled so that KOMPOCRETE sets the SAME DAY it is installed. Thus it can be trowelled to a hard smooth finish because there is no overnight interruption.

- 10 When you come to figure the cost of installing KOMPOCRETE, pick up your pencil and take off the savings of better traffic conditions and the profit of increased production—then you get a fair idea of the NET cost involved and the actual economy.

For new buildings or to replace or cover old floors in present structures.

Send for Floor-Need Analysis sheet to find your own requirements.

Largest Post Office in the World

Covers 14½ acres. KOMPOCRETE heavy duty mastic flooring stands tons of traffic, rolling day and night.

Flooring stands up un

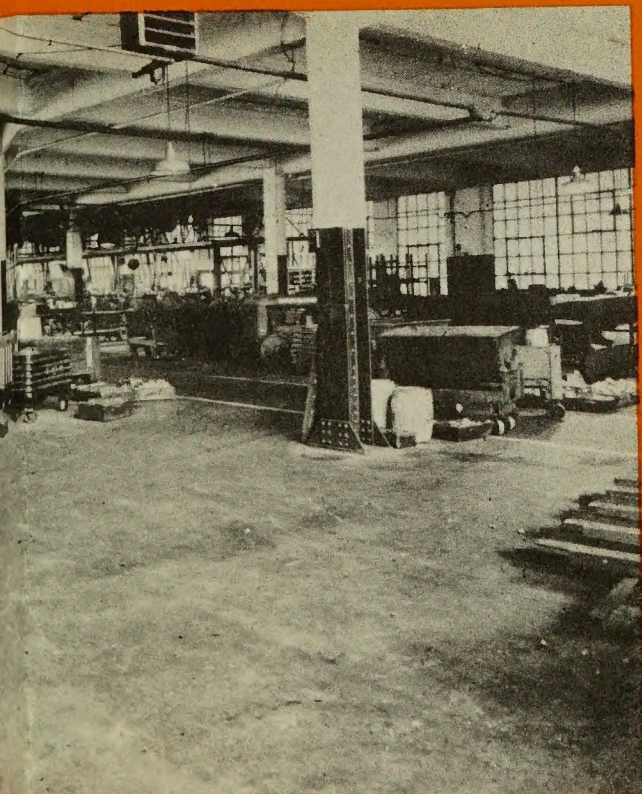

Installed on a new resilient asphalt
in a large metal-working plant.

For 24 hours a day, 7 days a week, this Kompolite Co.
installation gives perfect service—a lifetime floor.

Heavy Duty Flooring ASPHALT MASTIC

Resistant • Dustless • Shockproof

Mastic resilient floor replaced an old wood block floor in
the traffic lanes and machine areas of this great plant.

Manufacturing, Heavy-duty Mastic
stands up under severe conditions.

Kompolite Engineering Can Solve Your Flooring Problems

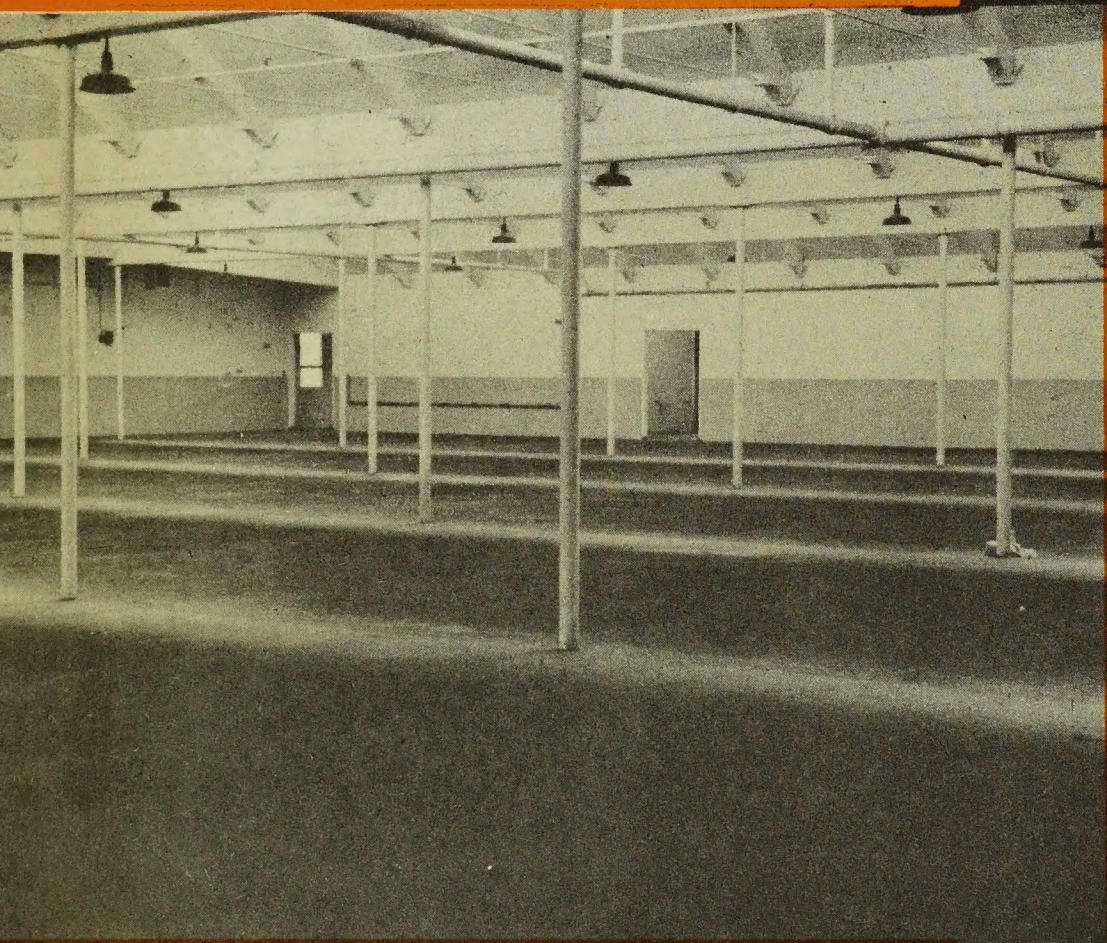

Our technical research and experiments have given us the know-how to meet all sorts of conditions. Laboratory control of every ingredient and product makes every Kompolite Co. floor a success.

For nearly fifty years we have pioneered in the development of better flooring, and in the past five years alone we have installed more than ten million square feet of KOMPOCRETE in scores of industrial plants all over the country.

Kompolite Co. engineering service may be very valuable and helpful to you—and it is yours for the asking.

Smooth, resilient, wear-resistant surface on outdoor loading platform installed by Kompolite Co.

Section of a large tobacco warehouse, where KOMPOCRETE resilient construction stands the humid atmosphere.

KOMPOCRETE can be installed any time of year, at high or low temperatures, setting without cracking because the setting time is chemically controlled.
